Field Vist Report

Under MoU Government of Maharashtra Approved Soil and Water Testing Centre,
Malegaon Camp Dist.- Nashik

Geography Department of M.P.H. Arts, Science and Commerce Mahila College, Malegaon and Government of Maharashtra Approved Soil and Water Testing Centre, Malegaon Camp Dist.- Nashik jointly organized . A filed visit was organized for students of geography department. Date 18/05/2022 in this field visit 21 students ware present purpose of the visit about Soil and Water Analysis. Prof. Vitthal Shelar, Department of Geography explained the purpose of this trip. India is an agriculture based country, so the majority of people are engaged in agriculture. In the pursuit of maximizing the available agricultural output to meet the food needs of the growing population, the quality of the soil decline resulting in a decline in productivity. This is because our farmers in India do not seem to be testing the soil. Therefore, the students in our college area know which element is lacking in the soil test and water test and the amount of fertilizers can be reduced or increased in that soil.

Mr. Prashant Wani, Director of Government of Maharashtra Approved Soil and Water Testing Centre, Malegaon Camp explained the method of soil and water testing. It includes determination of soil texture, water holding capacity and diagnosis of problematic soils. How to analyze water sample. Determination of water pH and chloride. These points are explained to the students and faculty members. This field visit is very useful to our Geography department students and faculties.
