The Director gave detailed information on how such non-chemical edible oils are good for health. This kind of small business, cottage industry we can run; it gives us a good income and at the same time we can provide employment to some people. Also, after extracting oil from these oilseeds, the remaining one-fourth of the oilseeds can be used as animal feed and you can also get good financial income from it.

This information can definitely be used by the students for their future. The ability to create jobs instead of seeking employment can be created by students through such initiatives.

Thus, the benefit to the college from the joint proposal made by the organization Heart Care is that it can help in facilitating the process of promotion and sale of their products, as well as increase the sales volume.

Knowing the benefits and benefits of consuming this type of non-chemical oil can also help to have a positive effect on people's health. This is because medical research has shown that many types of physical ailments are caused by chemical edible oils.

Dr. Meena Patil, Assistant Professor, (Department of Economics), Associate Professor Prof. S.B. Patil and students Priyanka Ahire, Siddhi Kokande, Deepali Bhadane, Reena Khairnar, Alia Beg, Sujata Kumar, Durga Gawli, Varsha Gawli, Pragati Salunkhe and other students were present on the occasion of the visit.
